Review Results to the authors : 10.07.2022  
Book release date : 15.08.2022

## About the Book

In this era of growing conflicts and global competition the world needs education, the key factor for societal development, more than ever for sustainable development. Education for sustainable development empowers learners with knowledge, skill, value and attitude to take informed decisions and make responsible actions for a just society, economic viability and environmental integrity. Education must be a lifelong learning process and is an integral part of the quality education as envisioned in the UNO's SDG. It enhances the cognitive, social, emotional and behavioural dimensions. Education needs to be holistic and transformational encompassing learning content, pedagogy and outcomes including learning environment. Such education if imparted would be a key enabler of all Sustainable Development Goals and achieve societal transformation with ease. Keeping this in mind the editors has intended to publish this edited volume on Education for Sustainable Development in the following subthemes

## Subthemes

- Education for building a sustainable world
- Integrating sustainability issues -17 SDG in all forms of learning
- Learning Environment – to enable student centric learning that is progressive and highly-effective in providing personalized learning experience
