ABOUT THE CONFERENCE

Science and Technology (S&T) is widely acknowledged as a critical tool for promoting the country's economic and social growth. It has played a significant role in India's progress in the past 75 years. All sectors are benefited from science. Science has improved the global economy, increased job opportunities, saved millions of lives, and has a significant impact on a variety of industries. Whenever a new technology is found, it leads to new industries. For example, if a new scientific instrument is invented, qualified personnel will be required to operate it. Such inventions aid in increasing employment opportunities. New technologies like wireless brain sensors, artificial organs, smart inhalers, robotic surgery, virtual reality are making work easier for thousands of doctors around the world. Furthermore, these technologies are saving and treating millions of lives. Food is one of our most fundamental needs. For farmers, science has made things a lot easier. Irrigation improvements, improved fertilizers, advanced equipment and pesticides are all assisting farmers in working more efficiently and saving money. In the field of scientific research, India is one of the topmost countries in the world, and one of the top five countries in the field of space exploration. As India celebrates its 75th anniversary of independence, the conference aims to highlight the role and impact of Science and Technology in the development of India in various fields by experts.
