ABOUT THE SEMINAR

In recent years, women's status in India has significantly improved, and many of them now hold prominent and renowned positions in governmental and corporate institutions. Women in today's world have progressed from being purely domestic to multitasking. The COVID-19 pandemic is harming health, and social and economic well-being worldwide, with women at the centre. It has had a devastating impact on the lives and livelihoods of women globally. It has enlarged gender gaps and aggravated pre-existing inequalities in a variety of contexts. Women and girls must be an essential part of the recovery process as the world continues to struggle with the social and economic effects of the COVID-19 pandemic. The well-being and socioeconomic advancement of families, communities, and nations depend on the empowerment of women.
